| 1 Focus on Weight Loss Magazine |                                  |

First order will include all components, subsequent orders include product only.

## *In the Beginning...*

Often, despite good intentions, diets don't always live up to expectations. Still, products with nasty side effects or unsafe ingredients are **not** your only alternative. Immunotec offers a simple option.

Begin with sensible eating (a variety of fruits, vegetables, and whole grains), participate in various forms of physical activities, and then take on the **PRYCENA Weight Loss System** as your partner!

### *Precisely Prycena!*

An excellent source of protein, the PRYCENA shake combines a high concentration of dairy calcium, fiber, and two unique micro-peptides into a delicious way to help curb your appetite and stimulate your body's natural ability to burn fat and calories.

Another crucial ingredient is Larch Arabinogalactan - a natural fiber source that helps to increase healthy bacteria in the system.

The peptides, along with fiber, also give you a feeling of fullness. A PRYCENA shake is safe, natural, and effectively helps you lose weight!

### *Heat FX*

When you need a little something to give your body some *extra* help, the NEW PRYCENA THERMAL ACTION is the answer! Whether to jump start your weight-loss efforts or to break through a weight-loss plateau, this unique combination of three key ingredients provides a THERMOGENIC effect that helps your body switch on its fat-burning action by raising your body temperature.

#### *Key Players - Introduced!*

**Chromium Picolinate** - Targets carbohydrate, fat, and protein metabolism to help support weight management, glucose and cholesterol control.

**Green Tea & Guarana** - Research shows that together, they have a thermogenic action, working synergistically to increase the body's own ability to burn calories and decrease fat by raising body temperature. Exercise is also an important part of any weight maintenance program and PRYCENA THERMAL ACTION will provide the get-up-and-go you need to exercise and keep up with your busy day.

### *Stress Reduction*

Stress has negative effects on health. It releases a hormone called cortisol. While this hormone is crucial for our survival, a constantly elevated cortisol level has been shown to contribute to weight gain. Stress may also lead to overeating or poor food choices... not conducive to weight management.

**PNT 200**, Nature's Tranquil Peptide is a natural, safe, and effective way to reduce stress, and is clinically proven to reduce cortisol levels. PNT 200 also promotes a good night's sleep; another great way that the body burns fuel and regenerates itself.

## *Embracing Effort*

If you are overweight, shedding a modest amount like 5 to 15% of total body weight reduces the risk factors for some diseases. It all starts with healthy eating, plenty of water, and exercise. Then embrace the **COMPLETE PRYCENA WEIGHT LOSS SYSTEM**.

Combine a PRYCENA shake, PRYCENA THERMAL ACTION, and PNT 200 with healthy eating, exercise, and stress management to "fuse" the building blocks of optimum weight-loss.

## The Prycena Weight Loss System... Complete. Effective.
